Reg. No 10723834
VAT No EE100671779

- f. Rectangular, square and circular hollow sections according to the standard EN10219 are accepted.
- g. Steel grades S235JR, S355J2, S355J2H with 3.1 certificates. Steel according to EN10025, basic requirements, without options. Steel density for profiles 7,85.
- h. For Built-up profiles we assume fillet welding with $\leq a_6$.
- 3. Surface treatment in our workshop
 - a. Beveling of sharp edges 1 x 1 mm only for cut edges and no rounding.
 - b. No need for rounding of drilled holes – only trimming 0,5 mm/45 degrees.
- 4. Scope of erection
 - a. Erection works is **not included** in this offer.
- 5. Transport and packing
 - a. Transport sizes as described in the price table.
 - b. Standard packing procedure of Maru has been assumed.
 - Large elements such as columns, main beams etc. will be transported loose – wooden dividers to be used.
 - Smaller elements such as beams, braces, wall elements etc. will be bound with stripes and stacked with dividers made of wood.
 - No special steel frames are used as packages.
 - Packing List according to Maru draft.
- 6. Miscellaneous
 - a. Contract language is English.
 - b. We assume that the possible contract will be a unit price contract i.e. the final accounts will be calculated by multiplying unit prices and actual quantities given in the final list of materials.
 - c. The following are excluded from the scope of the offer: non-carbon steel elements, bending of items, milling and machining.
 - d. ~~The price offer does not reserve our production resources. Before the purchase order/contract, please coordinate the reservation of the resources.~~
 - e. Maru Metall reserves right to change prices if quantities, type of structures or technical demands will be changed.
 - f. Maru reserves the right to use subcontractors and partners.
