Katera Steel Oy

16.07.2026 HP11257-3

PRICE OFFER

Project: Pedestrian Steel Skybridge - Kotka CAM (2E500) - Easpring
Project address: Keltakalliontie 27, 48770, Kotka, Finland

Price offer is calculated according to IFC model and drawing received on 15.07.2026 from Taisto Suutari <taisto.suutari@katerasteel.fi>.

PRICE, EUR VAT 0%

1. Pedestrian Steel Skybridge

No.	Name	Paint system	Amount	Unit	Price, €	Unit price
1.	Steel constructions manufacturing		206 414	kg	576 885	
1.1	WI columns	C3.07	72 143	kg	222 073	3,08
1.2	WI beams	C3.07	40 264	kg	99 130	2,46
1.3	Beams	C3.07	60 473	kg	154 949	2,56
1.4	Bracings (horis.+vert.)	C3.07	22 389	kg	59 523	2,66
1.5	Frame	C3.07	4 357	kg	12 820	2,94
1.6	CFJ parts (delivered separately)	C3.07	755	kg	3 604	4,77
1.7	Erection plates and support plates	C3.07	6 033	kg	24 785	4,11
2.	Transport: - 10 pcs standard truck 2,4x2,6x13,5 m; - 1 pcs special truck 2,4x2,6x20 m.		1	set	14 400	
TOTAL:					591 285	
Delivery time, Pedestrian Steel Skybridge: 1. W32/2026 - start of fabrication and material purchasing 2. W44-47/2026 – deliveries to site						

Delivery terms: DAP Keltakalliontie 27, 48770, Kotka, Finland
Offer is valid: 07.08.2026

The price offer includes:

AS Maru Metall

Järvevana tee 5
10112 Tallinn, ESTONIA
www.maru.ee

Phone +372 650 8820
E-mail metall@maru.ee

Reg. No 10723834
VAT No EE100671779

- Steel structures fabrication
- Surface coating as stated Price Tables above
- Surface preparation grade P2, EN ISO 8501-3
- Transport

The price offer does not include:

- Erection Works
- Workshop drawings
- Roofing sheets
- Fasteners
- Fire protection painting

ASSUMPTIONS AND REMARKS

1. Workshop drawings

Workshop drawings delivered by client will meet the following conditions:

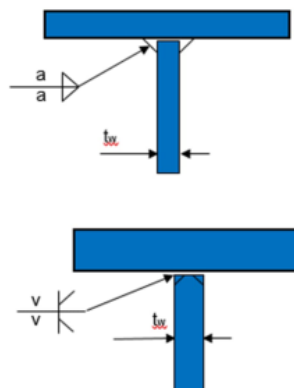

- a. All workshop drawings will be in “pdf” and “dwg” format with all necessary dimension lines and info shown on drawings.
- b. Tekla generated DSTV files for CNC manuf. machines will be delivered for cutting-drilling plates and profiles.
- c. Part list, assembly-part list and assembly list delivered in Excel format

2. Materials and fabrication

- a. Materials, certificates, fabrication, quality inspection and anticorrosion protection according to EN standards.
- b. Quality control and tracing of raw materials according to our ISO 9001 Quality manual.
- c. Fabrication of the structural steel according to EN1090-2, execution class EXC2, tolerances acc. class 1.
- d. CE marking will be issued by Maru Metall AS according EN 1090-1.
- e. Splicing of plates and profiles has been assumed to be permitted.
- f. Rectangular, square and circular hollow sections as shown in IFC models.
- g. Steel grades S235JR, S355J2, S355J2H with 3.1 certificates. Steel according to EN10025, basic requirements, without options. Steel density for profiles 7,85.
- h. If no detailed workshop drawings then we have assumed weld sizes for built-up profiles according to following table:

I shape beam			I shape column		
web t _w (mm)	a (mm)	v (mm)	web t _w (mm)	a (mm)	v (mm)
5...6	3		5...6	3	
7...8	4		7...10	4	
10...12	5		11...15	5	
13...15	6		16...18	6	
16...18	7		19...20	7	
19...20	8		21...23	8	
21...23		9	24...29		10
24...25		10	30...35		12
26...30		12	36...40		14
31...35		14	41...46		15
36...40		16	47...51		16

WELD SIZES, I –shape beams and columns

3. Surface treatment in our workshop
 - a. Surface preparation grade P2, EN ISO 8501-3.
4. Scope of erection
 - a. Erection works is **not included** in this offer.
5. Transport and packing
 - a. Standard packing procedure of Maru has been assumed.
 - Large elements such as columns, main beams etc. will be transported loose – wooden dividers to be used.
 - Smaller elements such as beams, braces, wall elements etc. will be bound with stripes and stacked with dividers made of wood.
 - No special steel frames are used as packages.
 - Packing List according to Maru draft.
6. Miscellaneous
 - a. We assume that maximum weight of single elements to be manufactured and lifted on site is ≤ 20 tons.
 - b. We assume that the possible contract will be a unit price contract i.e. the final accounts will be calculated by multiplying unit prices and actual quantities given in the final list of materials.
 - c. The following are excluded from the scope of the offer: non-carbon steel elements, bending of items, milling and machining.
 - d. The price offer does not reserve our production resources. Before the purchase order/contract, please coordinate the reservation of the resources.
 - e. Maru Metall reserves right to change prices if quantities, type of structures or technical demands will be changed.
 - f. Maru reserves the right to use subcontractors and partners.

Yours sincerely,
