COVER PLATES $t=4$ mm WELDING

The diagram shows a cross-section of a butt joint. Two horizontal plates are joined by a vertical weld line. On each side of the weld, there is a cover plate of thickness $t=4$ mm. The cover plates are welded to the main plates. The weld is a double V-groove weld. The cover plates are shown with dashed lines indicating they are not to scale. The main plates are shown with solid lines. The weld is shown with a hatched pattern. The cover plates are labeled 'COVER PLATES $t=4$ mm WELDING'.

Technical drawing of a mechanical part. The drawing includes a scale of 7:1 and a feature labeled 1-D20. The part is shown in a cross-sectional view with a dashed line indicating a hidden feature.

COVER PLATES $t=4$ mm WELDING

The diagram shows a cross-section of a butt joint. Two horizontal plates are joined by a vertical weld line. On each side of the weld, there is a cover plate. The cover plates are labeled with a thickness $t=4$ mm. The welding process is indicated by the word "WELDING". The joint is shown in a perspective view, with the cover plates extending along the length of the main plates.

Technical drawing of a mechanical part showing a cross-section. A dimension of 7 is indicated for a horizontal segment. A fillet with a radius of 1°D20 is shown connecting two surfaces.
